Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	Application No. 10/044,457	Applicant(s) RUSSELL, JOHN DAVID	
	Examiner Ryan F. Pitaro	Art Unit 2174	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 12 December 2005.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) ☒ Claim(s) 1-26 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-26 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \*    c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

### **DETAILED ACTION**

1. Claims 1-26 have been examined.

### ***Response to Amendment***

2. This communication is in response to Amendment B filed 12/12/2005. Claims 1, 11, 14, and 24 are independent claims.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 5-6, 8-14, 18-19, 21-26 have been rejected under 35 U.S.C. 102(b) as being anticipated by Meek ("Meek", US 6,111,574).

As per independent claim 1, Meek discloses a computer implemented method of depicting a plurality of items and how said plurality of items satisfy multiple criteria, the method comprising the computer-implemented steps of: displaying in a particular order a list of visual indicators (Column 4 lines 59 – Column 5 line 1), wherein the particular order indicates how a plurality of items satisfy a first criteria (Column 4 lines 59 – Column 5 line 1); detecting input indicating the selection of a second criteria (Column 5 lines 1-27); in response to detecting said input, determining how said plurality of items

satisfy the second criteria; and while retaining said particular order, displaying a visual indication of how said plurality of items satisfy the second criteria (Figure 5).

As per claim 5, which is dependent on claim 1, Meek discloses a method wherein the step of displaying a visual indication includes displaying one or more other visual indicators visually associated with a subset of items that satisfy said second criteria (Figure 5).

As per claim 6, which is dependent on claim 1, Meek discloses a method wherein the step of displaying a visual indication includes altering the visual appearance of one or more visual indicators from said list of visual indicators (Column 5 lines 49-64).

As per claim 8, which is dependent on claim 1, Meek discloses a method wherein the step of detecting input indicating the selection of a second criteria includes detecting input selecting a particular category of a plurality of categories (Column 5 lines 1-27); and the step of displaying a visual indication of how said plurality of items satisfy a second criteria includes displaying a visual indication of which items of said plurality of items belong to said particular category (Column 5 lines 1-27).

As per claim 9, which is dependent on claim 8, Meek discloses a method wherein said step of detecting input selecting a particular category includes detecting that a user has selected said particular category as a selection in a list box listing said plurality of categories as selections (Column 5 lines 1-27).

As per claim 10, which is dependent on claim 1, Meek discloses a method detecting input indicating the selection of a third criteria (Column 5 lines 28-48); and while retaining said particular order, displaying a visual indication of how said plurality of

items satisfy said third criteria, wherein said third criteria is different from said second criteria (Column 5 lines 28-48, Figure 5 ).

As per independent claim 11, Meek discloses a method of generating a page this causes a browser to depict a plurality of items and how said plurality of items satisfy multiple criteria, the method comprising the steps of: generating first page elements that cause said browser to display in a particular order a list of visual indicators, wherein the particular order indicates how said plurality of items satisfy a first criteria (Column 4 lines 59 – Column 5 line 1 ; generating one or more second page elements that enable the browser to receive user input indicating a selection of one or more criteria of a plurality of criteria (Column 5 lines 1-27) ; and generating third page elements that cause the browser to display, for each particular criterion of a plurality of criteria, a visual indication of how said plurality of items satisfy said particular criterion, without changing said particular order, in response to receiving user input indicating a selection of said particular criterion (Column 5 lines 1-48, Figure 5).

As per claim 12, which is dependent on claim 11, Meek discloses the steps further include issuing a query to a database system that stores information about said plurality of items, wherein said query requests data that may be used to determine which set of items of said plurality of items satisfy a first criterion of said plurality of criteria; receiving results of the query from the database system; and wherein the step of generating third page elements is based on an examination of the results (Column 5 line 49 - Column 6 line 24).

Art Unit: 2174

As per claim 13, which is dependent on claim 11, Meek discloses a method including performing an examination of contents of said plurality of items to determine which of said plurality of elements satisfy a particular criteria of said plurality of criteria wherein the step of generating third page elements is based on said examination of the contents (Column 5 lines 49 – Column 6 lines 24).

Claim 14 is similar in scope to that of claim 1, and is therefore rejected under similar rationale.

Claim 18 is similar in scope to that of claim 5, and is therefore rejected under similar rationale.

Claim 19 is similar in scope to that of claim 6, and is therefore rejected under similar rationale.

Claim 21 is similar in scope to that of claim 8, and is therefore rejected under similar rationale.

Claim 22 is similar in scope to that of claim 9, and is therefore rejected under similar rationale.

Claim 23 is similar in scope to that of claim 10, and is therefore rejected under similar rationale.

Claim 24 is similar in scope to that of claim 11, and is therefore rejected under similar rationale.

Claim 25 is similar in scope to that of claim 12, and is therefore rejected under similar rationale.

Claim 26 is similar in scope to that of claim 13, and is therefore rejected under similar rationale.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-4,7,15-17,20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Meek ("Meek", US 6,111,574) in view of Gorman ("Gorman", US 6,738,770).

As per claim 2, which is dependent on claim 1, Meek fails to disclose a self-contained page. However, Gorman discloses a method wherein the steps further include a browser receiving a self-contained page (Figure 4a); and wherein the steps are performed by said browser in response to executing said self-contained page, without said browser having to interact over a network with a server to determine how said plurality of items satisfy said second condition (Figure 4a). Therefore it would have been obvious to an artisan at the time of the invention to combine the teaching of Meek with the teaching of Gorman. Motivation to do so would have been to successfully filter multiple columns of data grids.

As per claim 3, which is dependent on claim 2, Meek-Gorman discloses a method wherein the step of the browser receiving the self-contained page includes the browser receiving the self-contained page over the network from the server (Gorman, Column 4 lines 39-54).

As per claim 4, which is dependent on claim 2, Meek-Gorman discloses a method wherein the step of the browser receiving the self-contained page includes said browser causing said self-contained page to be read from removable computer-media (Gorman, *Column 4 lines 3-39*).

As per claim 7, which is dependent on claim 1, EAST discloses a method wherein said first criteria is based on an alphabetic order of names associated with said plurality of items, and the particular order of the list of visual indicators indicates the alphabetic order of the name of the items (Gorman, Figure 4c, Column 5 lines 41-55);

Claim 15 is similar in scope to that of claim 2, and is therefore rejected under similar rationale.

Claim 16 is similar in scope to that of claim 3, and is therefore rejected under similar rationale.

Claim 17 is similar in scope to that of claim 4, and is therefore rejected under similar rationale.

Claim 20 is similar in scope to that of claim 7, and is therefore rejected under similar rationale.

### ***Response to Arguments***

Applicant's arguments with respect to claim 1-26 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ryan F Pitaro whose telephone number is 571-272-4071. The examiner can normally be reached on 7:00am - 4:30pm Monday through Thursday and on alternating Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kristine Kincaid can be reached on 571-272-4063. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
